Teaching and Learning Activities (TLA) & Assessment Tasks (AT)

Patrio Chiu, Ph.D.

Talent and Education
Development Office

香港城市大學
City University of Hong Kong

Let's see how much you
remember from last class

What have you learn from last class?

- OBTL
- ILO
- Bloom's Taxonomy

What is Outcomes Based Teaching and Learning (OBTL)?

Bloom's taxonomy verbs

Bloom's Taxonomy

Outline

1. What are TLAs
2. Active Learning Strategies
3. Purpose of Assessment
4. Characteristics of Assessment
5. Constructive alignment
6. Rubrics and criteria
7. The importance of feedback

Teaching and Learning Activities?

These are simply **any activity which stimulates, encourages** or **facilitates** learning of **one or more** Intended Learning Outcomes

- ❖ It is important to ensure that the **TLA is appropriate** for the **ILO** and any subsequent **Assessment Tasks**.
- ❖ They can be as **diverse** as lectures, quiz, discussions...
- ❖ Can use a particular learning theory to guide the development of the activity – operant learning, social-cognitive, constructivist, etc.

Can you recall some of TLAs that you have conducted in class?

- There are many TLA methods used in higher educations, but **how to choose?**

- | | |
|----------------|--------------------------------|
| • Lecture | Logs |
| • Discussion | Journal |
| • Test | Book review |
| • Quiz | News paper articles |
| • Presentation | Work-based problem |
| • Group work | Committee of enquiry report |
| • Writing | Conference paper |
| • Exercise | Portfolio |
| | Poster |
| | Simulate professional practice |
| | Make a video |
| | Demonstration |
| | Answer to client's question |

Cone of Learning (Edgar Dale)

***After 2 weeks
we tend to remember...***

***Nature of
Involvement***

Edgar Dale, *Audio-Visual Methods in Technology*, Holt, Rinehart and Winston.

Active Learning Strategies

What is active learning?

- It is a planned series of actions or events **to invite the participant to process, apply, interact and share experiences** as part of the educational process.
- The interactive components support the goal and the educational objectives of the learning activity.

Opening questions →

In order for students to learn effectively, they must make connections between what they already know (prior knowledge) and new content to which they're exposed. The opening of a lecture should facilitate these connections by helping students exercise their prior knowledge of the day's subject matter

Think-Pair-Share

Focused listing →

Focused listing is a strategy in which students recall what they know about a subject by creating a list of terms or ideas related to it.

Brainstorm

Large classes

- Many classes at CityU will be large classes
- These may range from 40 or 50 students to more than 100
- With that number of students, teachers need to use activities to reach the students

Large classes

(Source: UC – Berkeley)

1. **Decide what content to cover and set broad goals well in advance.**
2. **Organize the topics in a sequence that makes sense.**
3. **Prepare different types of lectures.**
4. **Create a clear syllabus.**

Large classes

(Source: Ohio State University)

5. **Facilitate Class Discussion**
6. **Encourage Peer Instruction**
7. **Collect Data and Perform Formative Assessment**
8. **Take Attendance**

Discussion

Which are the 3 most important For Large Classes?

1. **Decide what content to cover and set broad goals well in advance.**
2. **Organize the topics in a sequence that makes sense.**
3. **Prepare different types of lectures.**
4. **Create a clear syllabus.**
5. **Facilitate Class Discussion**
6. **Encourage Peer Instruction**
7. **Collect Data and Perform Formative Assessment**
8. **Take Attendance**

Question

At the end of this class, do you want to have **an online pop quiz** that is worth 10% of the course?

Yes/No

No...we are not going
to have any pop quiz...

Assessment can
capture students'
attention

*"With great power comes
great responsibility"
~Voltaire*

Compiled by NetSysCon find more inspiring quotes at

Assessment is a
powerful tool for
teachers.

Question:

What is the purpose of
assessment?

(Please think and share)

Purposes of assessment (1)

► Teachers

1. Making **judgements** on student performance
2. Evaluating effectiveness of a course
 - Informing how teachers teach
3. Being part of the teaching and learning activities

Purposes of assessment (2)

- Students

- Motivating students to learn
 - Being part of the learning experience
- Demonstrating skills and knowledge learned
- Receiving feedback on their performance
- Acquiring academic qualifications

Characteristics of **Assessment**

Do you think the assessment is fair?

Characteristics of **Assessment** (Example)

- Learning outcome: To repair a computer
- Assessment: Presentation on how to ride a bicycle

Misalignment!

Example on Constructive Alignment of ILO, TLA and AT

ILO's

Students will be able to **identify** 3 learning theories

Students will be able to **construct** a table with key features of learning theories

Students will be able to **generate examples** and implement a teaching session in which ILOs are aligned with TLAs based in specific learning theories

TLA's

Reading, Lecture

Practice creating tables of differences in theories as a small group activity

Class brainstorming discussion followed by individual choice in type of teaching session to implement, Peer consultation/review

AT's

Multiple choice quiz & examination question

Homework assignment or exam questions where key features of LT's are filled in

Assessed delivery on topic of own choice

Learning Theories

Behavioral – feedback on quiz will change exam performance

Social Cognitive – increase self-efficacy through practice. Increase motivation through social engagement

social cognitive (peer review)

Question:

As the course leader of a newly developed course, what are the key **characteristics** of assessment?

(Please think, discuss with your classmate sitting next to you, and share)

The Characteristics of Effective Assessment

1. Valid

- The assessment should measure what is intended.

2. Reliable and consistent:

- Assessment criteria and marking schemes should be robust so that grades are consistent when more than one assessor marks the work or when one assessor marks the work on different occasions.

3. Transparent

- The assessment should be clearly aimed at meeting the learning objectives for the topic.

4. Fair

- All students should have the same opportunity to succeed.

5. Efficient and manageable

- The assessment should be streamlined to ease the burden of marking and giving feedback.

6. Effective Feedback

- Students should always have the opportunity to learn from their mistakes.

Assessment Aligned to Learning Outcomes

Assessment

At the course level (CILOs)

At the programme level (PILOs)

At the institutional level
(Graduates Outcomes)

SG8001

Assessment: Demonstration Teaching Ability (15 minutes presentation)

SG8001 Course Intended Learning Outcome #4: Deliver a high quality teaching and learning activity

PhD Program Intended Learning Outcome (CB)#7: Demonstrate some teaching ability in the context of tertiary education

CityU Graduate Outcomes #4: Apply effective communication skills in relation to research

Question:

Have you ever received an unfairly graded **assessment**? What happens?

Talk to your classmate and share.

Tutor's role in Assessment

1. Valid
 - The assessment should measure what is intended.
2. **Reliable and consistent:**
 - Assessment criteria and marking schemes should be robust so that grades are consistent when more than one assessor marks the work or when one assessor marks the work on different occasions.
3. Transparent
 - The assessment should be clearly aimed at meeting the learning objectives for the topic.
4. **Fair**
 - All students should have the same opportunity to succeed.
5. Efficient and manageable
 - The assessment should be streamlined to ease the burden of marking and giving feedback.
6. **Effective Feedback**
 - Students should always have the opportunity to learn from their mistakes.

A Reliable and Fair Assessment: Using Criteria

Student performance in assessment tasks should be judged against a set of **clear assessment criteria** defining the **quality of performance** expected of each of the grades.

We should use **rubrics**!

What is a rubric?

- A rubric is a **scoring guide** that seeks to evaluate a student's performance based on the sum of a full range of criteria.

Analytic rubrics	
	LEVELS
DIMENSIONS	
	CRITERIA
A criterion is written for each dimension at each level Performance is assessed along separate dimensions; the grade is decided by adding the scores of the parts. Different weighting may be allocated to each dimension to account for their relative importance.	

Example: Chocolate chip cookie rubric

	Poor (1)	Needs Improvement (2)	Good (3)	Delicious (4)	Score
Number of Chips	Too few or too many chips	Chocolate in 50% of bites	Chips in about 75% of bites	Chocolate chip in every bite	x2
Texture	Texture resembles a dog biscuit	Texture either crispy/crunchy or 50% uncooked	Chewy in middle, crisp on edges	Chewy	x1
Color	Burned	Either dark brown from overcooking or light from undercooking	Either light from overcooking or light from being 25% raw	Golden brown	x1
Taste	Store-bought flavor, preservative aftertaste – stale, hard, chalky	Tasteless	Quality store-bought taste	Home-baked taste	x1
Richness	Nonfat contents	Low-fat contents	Medium fat contents	Rich, creamy, high-fat flavor	x1
Total					

SG8001 Assessment Task Guideline

- Students can choose any academic topics for their presentations: including research topic, lecture topic or laboratory topic...etc
- A 10 minute teaching demonstration video using your own recording device and submit it online via Canvas. The Video should record the upper body of the presenter, showing the PPT in the video is NOT required.
- Regard the audiences as year 1 university students.
- **The use of PowerPoint is required.** The presentation should follow the OBTL framework with clear **ILOs, TLAs, and ATs.**
 - The following is a common teaching structure and is for your reference:
 - Introduction (the “why”/ a problem)
 - 1 ~ 3 ILOs (Please be realistic and include proper action verbs)
 - Main content (+ TLAs)
 - Summing up + ATs
 - **Not including the ILOs, TLAs, or ATs will almost definitely result in a dissatisfactory grade.**

The assessment can be found on Canvas.

● **SG8001 Teaching Students: First Steps – Assessment Rubrics**

Criteria	Fail	Adequate	Good	Excellent	Score
● Content	Intended Learning Outcomes (ILOs), Learning & Teaching Activities (LTAs) or Assessment Tasks (ATs) is/are not stated nor aligned; content is erroneous or irrelevant.	Intended Learning Outcomes (ILOs), Learning & Teaching Activities (LTAs) and Assessment Tasks (ATs) are stated and aligned in general; content is accurate but not always relevant.	Intended Learning Outcomes (ILOs), Learning & Teaching Activities (LTAs) and Assessment Tasks (ATs) are clearly stated and aligned; content is accurate and relevant.	Intended Learning Outcomes (ILOs), Learning & Teaching Activities (LTAs) and Assessment Tasks (ATs) are vividly stated and constructively aligned; content is accurate, thorough, and directly on point.	Score: /8
● Organization	Little or no structure present. Presentation is confusing to the audience; no logical sequence of ideas; frequently off topic. Presentation falls well outside set time parameters; ILOs, LTAs and ATs are presented in a wrong sequence, and inappropriate proportion of time is allocated.	Identifiable structure is present but inconsistently executed; may contain several statements out of place and occasionally deviate from topic. Presentation falls slightly outside set time parameters; ILOs, LTAs and ATs are presented in a correct sequence, but inappropriate proportion of time is allocated.	Identifiable structure is present and consistently executed with few statements out of place. Presentation meets set time parameters; ILOs, LTAs and ATs are presented in a correct sequence, and appropriate proportion of time is allocated.	Identifiable structure is presented in a purposeful, interesting, and effective sequence and remains focused. Presentation makes full, effective use of time and stays within time parameters; ILOs, LTAs and ATs are presented in a correct sequence, and good proportion of time is allocated	Score: /4
● Engagement with Students	Relies on a narrow range of instructional strategies. Methods are often ineffective in engaging students, leading to low interest.	Uses a limited range of instructional strategies. Some methods may engage students, but there are periods of low interest.	Regularly uses a variety of instructional strategies to engage students. Methods are effective in maintaining student interest.	Consistently employs a variety of instructional strategies that actively engage all students. Uses innovative and creative methods to maintain high levels of interest.	Score: /4
● Language	The student usually makes response-oriented and limited use of English and may minimally address some requirements of a simulated teaching activity. Responses contain many inaccuracies in vocabulary, grammar, and pronunciation. Frequent and extended self-corrections and hesitations or pauses occur as student tries to find adequate lexical and grammatical forms. Consistent errors in production and frequent breakdowns occur, resulting in limited intelligibility. Student may generate sentence-length utterances which are reactive in nature and can elicit simple information with different types of questions, but when tasked with performing a higher-level function or topic obvious difficulty expressing and linking ideas and using appropriate verb tenses is evident.	The student has demonstrated that he or she can use English fluently in a simulated teaching activity, although frequently it may be strained, tentative or hesitant. It is adequately intelligible and grammatically correct and tends to be produced in the equivalent of short paragraphs, with evident use of literal translations and self-corrections. The student can use different language functions but control of aspect and some grammatical structures may be weak.	The student has demonstrated a high degree of fluency in a simulated teaching activity, although occasionally it may be strained, tentative or hesitant. S/he demonstrates sufficient accuracy, clarity, and precision to convey his/her intended message without misrepresentation or confusion. His/her speech can be understood by native speakers unaccustomed to dealing with non-natives, even though this may require some repetition or restatement.	The student is fully fluent and accurate with no demonstration of error patterns in basic structures, although s/he may make sporadic errors, particularly in less-used structures or in high-frequency, complex structures, but not distracting to a native interlocutor nor interfering with communication.	Score: /4

- *This rubric is adapted partially and modified based on the University of Southern Mississippi oral communication rubric, the Rubrics for Enhancing Professional Practice: A Framework for Teaching from ASCD and ACTFL Proficiency Guidelines 2012 and SG8002 Rubrics.

Feedback

- Feedback is essential for student learning. Students need to know how well or how poorly their learning is proceeding, where they might be going wrong, in what ways and what aspects of their learning can be improved

Feedback on assessment is very important

Formative and Summative Assessment

	Formative	Summative
Time	During a learning activity	At the conclusion of a learning activity
Goal	To improve learning	To make a decision
Feedback	Return to material/ learning issues	Final judgement
Frame of reference	Always criterion (evaluating all students according to the same criteria)	Sometimes normative (comparing each student against the others) Sometimes criterion (evaluating each student according to the same criteria)

Key Research Findings in Teaching & Learning

- Feedback has been shown to be one of the **most significant activities** a teacher can engage in to improve student achievement.

Hattie, 1992

- **Effective feedback is timely.** Delay in providing students feedback diminishes its value for learning.

Banger-Drowns, Kulik, Kulik, & Morgan, 1991

- Rubrics provide students with **helpful criteria for success**, making desired learning outcomes clearer to them. Criterion-referenced feedback provides the right kind of guidance for improving student understanding

Wilburn & Felps, 1983

- Effective learning results from students **providing their own feedback**, monitoring their work against established criteria.

Trammel, Schloss, & Alper, 1994

Characteristics of constructive feedback

- ***Informative***

Identifying strengths, weaknesses and ways to improve

Criterion-referenced

Relating to subject objectives/learning outcomes

Motivating

Giving encouragement whenever possible

Timely

As soon as possible

University Assessment Policy

- The purpose of the City University Assessment Policy and Principles for Taught Programmes (the Policy) is to clearly set out our philosophy and approach to assessment.
- http://www.cityu.edu.hk/qac/assessment_policy/university_assessment_policy.htm

WHY do we ASSESS?

1. INFORM INSTRUCTIONAL DECISIONS
2. ENCOURAGE STUDENTS TO LEARN

"You can enhance or destroy students' desire to succeed in school more quickly and permanently through your ***use of assessment*** than with any other tools you have at your disposal."

Rick Stiggins,

Assessment Trainers Institute

Thank you!
